Pedro Fevereiro	Oeiras	PT	It is absolutely unacceptable the use of force to prevent the democratically validated adoption of plant biotechnology. It's inexcusable the attempt to justify vandalism as occurred in Brazil now, with pseudo-scientific arguments, objectively false. Note that these events are replicas of what is occurring in the world, like the attempt to prevent the use of t "golden rice" or the destruction of genetically modified wheat trials in Australia . All who value the creation and use of knowledge should speak out against these situations.

Giovanni Walter	S_o Paulo	BR	
Christian Walter	Rotorua	NZ	It is important that scientists show their support for those affected. We need a factual debate about GE crops, not vandalism.
Sheila Ward	San Juan	US	
Ethan Warshow	Amherst	US	
Krista Washington	Corvallis	US	I condemn the vandalism of scientific research facilities and the associated disruption of biosafety deliberations in Brazil. We urge scientists to continue their important research and not to give in to violence and intimidation.
Moises Wasserman	Bogot_	CO	
Melody Watson	Berlin	DE	I want to support science.
Sebastian Weber	Lancaster	US	I believe in science it saved my life. I was going to an abusive church and the enlightenment of science stopped me from committing suicide.
Richard Weber	Plainsboro	US	
Gregg Weintraub	Hamilton	US	Support for science and against violence
Rachele Weintraub	Ithaca	US	Science is necessary to allow humans to grow with as little impact on the environment as possible. This research is vital and must continue.
